

Maxon Australia Customer Migration
Checklist for migration

This checklist is designed to serve as a guide to some of the steps we thought it would be prudent to do NOW, to ensure that once the time to actually change over arrives, you have already done a lot of the preliminary work. This page is a simple checklist, if you require further assistance, please don't hesitate to contact us.

- Captured all the MM-5100 ESN's
- Checked the account details for each modem (what usage account are they on)
- Do the MM-5100s have particular settings or initialisation strings (AT Commands)

If so, what are they:

What AT commands does the controlling equipment communicate with the modem through:

- Are your MM-5100s connected via a NON standard cable? Have you talked to Maxon about a replacement for the ModMax?
- Checked that the ModMax will fit into your equipment casing (if applicable)
- Have you calculated how many ModMaxes you will need? _____
- Have you pre-ordered them?
- Have you checked out the Telemetry specific plans that Telstra is offering?
(See <http://www.maxon.com.au/migration.php>)
- Have you considered whether to continue using circuit switched data or to swap to IP based packet switched data? (If you wish to use CSD, you will need a **DATA** number activated on your USIM cards)
- Have you read Telstra's Wireless Application Developers Guidelines? (Available at the above link)

If you have any questions, or require further assistance, please contact Maxon Australia (migration@maxon.com.au)
