

Dear Valued Customer,

We have available a Data Test Adapter for use with the SD125 Data Radio and our Internal Modem Options.

This is a handy device for quickly establishing communications between your equipment and our radio.

The RX LED indicates that the radio is Receiving Data from the Source, The TX LED indicates that the radio is sending Data to the Source. The PTT LED indicates the radio has been requested to send data by placing the radio in transmit mode and the CD indicator indicates the receiver has detected a transmission. CD LED ON shows mute is CLOSED, CD LED OFF shows mute is OPEN.

We trust this aid will be of assistance to you.
